

Huhtamaki Paper Recycling already has its own collection vehicles for waste paper collection within close proximity to its depot. Additionally, Huhtamaki Paper Recycling partners with regional hauliers for paper, cardboard and plastic collection in Belfast, Lisburn and right throughout Northern Ireland and the Republic. We have the flexibility and service to collect from your premises whenever convenient in order to minimise disruption to your operations. We will take the time to determine the most convenient method of collection from your premises to ensure a low-cost, easy solution to your waste paper issues.

As waste paper recycling is of paramount importance, it is good to know that all waste paper, cardboard and plastic collected is 100% recycled and our aim is to give you total peace of mind knowing that your waste paper is being dealt with in an environmentally friendly and commercial manner.

Huhtamaki's ethos is for local sourcing, local processing and local end manufacture to ensure the smallest carbon footprint possible. This is also known as the proximity principle. It helps then that Huhtamaki has the last remaining paper mill anywhere in Ireland ensuring the smallest carbon footprint between collection and end use.
